CREATE NEW PROFILES TO MONITOR STUDENT GROWTH

Profiles provide an overview of a student's level of development to help pinpoint areas of need that can be further assessed via Benchmark Assessments.

Profiles should be completed and updated annually by a team that routinely works with the student (i.e., teacher, paraprofessional, SLP, etc.), to ensure up-to-date academic, functional, and behavioral information.

These updates will enable their new teacher to easily identify strengths and goals for the student in the upcoming school year.
